Revision No.:

02

Date -**Time of Inspection -**

Sr. No.	Particular/ Equipment's Name	Checkpoint	Status (OK/NOT OK)	Corrective Action Taken
1	Waste/Trash Area	Waste bins are empty and clean at the dedicated area.		
2	Production Floor/ceilings/wall	The area is clean and debris-free. Floors, walls, windows, coving, cable trays, and ceilings are clean and free from dust and cobwebs. Dry and wet waste materials are properly contained and removed from the processing area.		
3	Hygiene Filler Equipment	Equipment soap solution, hand soap solution, and sanitizer bottles are in place, clean, and filled with solutions, with proper labels.		
4	Handwash station	The washbasin, foot-operated taps, and hand dryer are clean & in working condition. No leakage is found. Cleaning tanks are clean & without any remnants of material.		
5	Pest Control	No pest activity observed; roadboxes are in place and intact, free from rodents & droppings on the floor or equipment or products stored on pallets, and cable trays and fly catchers are operational. Check for tubelight & gluepad integrity.		
6	Personal Hygiene	Uniforms are clean, hairnets are worn properly, and there is no unauthorized jewelry. Workers' nails aren't grown, and no bandages or gloves are worn while handling the food.		
7	Weighing Scales	Calibrate scales for accuracy; check cleaning of all surfaces of scales and stands		
8	Sorting tables	Ensure tables are clean and sanitized. Check that table-mounted tube coverings are clean and dust-free. Check the cleaning of switchboards and stools/chairs and tubelights' integrity.		
9	SS Bowl/Sieves/ SS Tray/Bottom	No remnants of the previous material. Visual observation of clean, dry, and chemical-odor-free. Check sieve integrity.		
10	Light intensity	Before starting production, check the intensity of the lights on the tables and floor. All tubes are in working condition.		
11	Packaging material	Printed packaging and labels from the previous production have been removed from the line before changing to the next production.		
12	Glass, brittle acrylic, and fiber material	Check all the glass, brittle, acrylic, and fibrous material on the floor and production line. They should be properly numbered and without any damage or cracks.		
13	Metallic pens	Only metallic pens are used by all personnel working in the production area.		
14	AC	The AC is clean and in working condition with no damage or leakage. Temperature & humidity are maintained.		
15	Pallets/Crates	Pallets and crates are clean as per frequency. Free from product residue, pests & cobwebs.		
16	Temporary repairs and nuts bolts	Free from any temporary repairs and loose metallic nuts and tools.

Area: Lower Basement				
1	Shrink Wrap Machine/L-sealer/ Web-sealer/ Hand sealer/Foot sealer	The wheels, conveyor belt, and covering of the conveyor belt are clean and without any signs of wear or damage. Check the cleanliness of the switchboard and any sign of damage. Heating sensors, Teflon tape integrity.		
2	Pet Sealer	The conveyor belt is clean without any signs of wear or damage. Check heating sensors.		
3	Vacuum Machine	Check that the conveyor belt, vacuum pipe, and Teflon tape are clean and without any signs of wear or damage. The switchboard/display panel is without any damage. Heating sensors, Teflon tape integrity.		
4	Strapping Machine	Check that the conveyor belt, vacuum pipe, and Teflon tape are clean and without any signs of wear or damage. The switchboard/display panel is without any damage.		
5	Magnet	Magnets in the production line are in place & cleaned.

1	Metal Detector	Ensure the metal detector machine is calibrated with standard probes and working properly. Check the conveyor belt cleanliness and dust-free status for smooth operation.		
2	FFS Machine	Check cleanliness for the feeding hopper, collar, and the conveyor belt. No remnants of previous material. Free from any chemical odor. Ensure the metal detector machine of FFS is calibrated with standard probes and working properly.		
3	Destoner	Check cleanliness for the feeding hopper, conveyor belt, and outlet. No remnants of previous material. Free from any chemical odor.		
4	Vibroshifter	Check cleanliness for the sieves, outlets, and wheels of the vibroshifter. No remnants of previous material. Free from any chemical odor. Check whether the sieves are as per the required specification according to the product.		
5	Strapping Machine	Check that the conveyor belt, vacuum pipe, and Teflon tape are clean and without any signs of wear or damage. The switchboard/display panel is without any damage.		
6	Magnet	Magnets in the production line are in place & cleaned.

Area: Second Floor/Second Floor Mezzanine

1	Kruger Bar Moulding Machine	Product contact surfaces are clean, sanitized, and debris-free; Check cleanliness for the feeding hopper, roller, shafts, bar molds, and conveyor belts; verify that all guards and safety devices are in place and operational. Check for any signs of wear or damage. No remnants of previous material		
2	Sheeting and Cutting Machine/ Manual Cutter	No remnants of the previous material. Observe for the clean, dry, and chemical-odor-free parts. Product contact surfaces are clean and sanitized. Ensure the feeding hopper is clean and free from blockages. Inspect the conveyor belt, cutting blades, and cutting surfaces for cleanliness.		
3	Hot Air Oven/Roaster	Check the cleanliness of door gaps, oven base, corners, or any openings. No remnants of the previous material. Observe for the clean, dry, and chemical-odor-free parts. Check the door seals, hinges, gaskets, and switchboard for any signs of wear or damage.		
4	Trolleys/ roasting trays	Check the cleanliness of the trays, trolleys, corners, and wheels of the trolley. No remnants of the previous material. Observe for the clean, dry, and chemical-odor-free parts.		
5	Selmi Chocolate Machine	No remnants of the previous material in the tank. The blending slate, tank, and chocolate pouring knobs are clean and sanitized. Observe for the clean, dry, and chemical-odor-free parts.		
6	Chocolate Enrobing machine	No remnants of the previous material in the tank, conveyor belt, and cleaning box. The blending slates, tank, and chocolate pouring knobs or attachments are clean and sanitized. Observe for the clean, dry, and chemical-odor-free parts. Check for the integrity of the tube lights.		
7	Flow wrap machine	No remnants of the previous material in the conveyor or product contact surfaces. Observe for the clean, dry, and chemical-odor-free parts. Check for the correct laminate roll loaded & details to be printed.		
8	X-Ray machine	Ensure the X-ray machine is calibrated and working properly. Check the conveyor for smooth operation and visual observation of cleanliness and dust-free operation.		
9	Pan coater	Check whether the inner & outer surfaces of the coating tank and cooling vent/pipe are clean & sanitized. No remnants of the previous material. Observe for the clean, dry, and chemical-odor-free parts.		
10	Paddle Mixer	Observe for the clean, dry, and chemical-odor-free parts. No remnants of the previous material. Covers/outlet guards are in place, and paddles are secure and undamaged. The mixing/blending paddle, mixing bowl, and all the food contact surfaces are cleaned & sanitized.		
11	Slicer/mixers/ Pulverizer machine	Ensure that all the food contact surfaces, attachments, and corners are well cleaned and ready to use. Ensure the feeding hopper is clean and free from blockages. Check the blade's intactness and integrity.		
12	Magnet	Magnets in the production line are in place & cleaned.		
13	Deep Freezer	Observe for cleanliness and chemical-odor-free.

Area: Terrace Floor

14	Pan coater	Check whether the inner & outer surfaces of the coating tank are clean & sanitized. No remnants of the previous material. Observe for the clean, dry, and chemical-odor-free parts		
15	Slicer/Dicer machine/Slivering machine	Ensure that all the food contact surfaces, attachments, and corners are well cleaned and ready to use. Ensure the feeding hopper is clean and free from blockages. Check the blade's intactness and integrity.		
16	Blancher machine	Ensure that the machine is well cleaned and ready to use. The water bath is well cleaned with all sensors and valves in working condition. The wire net buckets are cleaned properly, and the mesh integrity is maintained. The blancher's sprockets are in good condition & cleaned.		
17	Magnet	Magnets in the production line are cleaned.		
18	Tank	No remnants of the previous material in the tank. Observe for the clean, dry, and chemical-odor-free parts
